

The AMACAST Advantage

Whether the objective of your blast cleaning operation is descaling, deburring, removal of casting sand, or creating a specific surface finish, AMACAST stainless steel shot can help you meet the challenge.

Recyclability

Exceeding the life of aluminum oxide, glass beads, mineral abrasive, garnet or slag by up to a thousand-to-one, AMACAST can significantly reduce your raw materials and disposal costs.

Health / Environment / Impact

AMACAST is non-hazardous and contaminant-free. Its use produces no free silica or its associated respiratory and environmental hazards.

Surface Finish

Whether you require a bright, metallic finish, free from staining and ferrous residue, or a specific surface profile to prepare for coating, AMACAST is the answer. Offered in five separate size ranges, AMACAST is designed to meet your specific production requirements.
