

As the leading international producer of cast steel abrasives, Ervin Industries' AMASTEEL trademark has become synonymous worldwide with product quality, reliability, and customer support.

AMASTEEL cast steel abrasives products continue to find broad and growing applications in such varied markets as:

Automotive	Office machine
Aerospace	Petrochemical
Agriculture	Railroad
Construction	Shipyard
Foundry	Stone cutting
Mining	

And various other major industries.

### **Ervin's Meticulous Quality Assurance**

In today's highly competitive market, quality assurance has become an issue of compelling importance. Ervin AMASTEEL has always excelled in this demanding environment.

We not only invite our customers to conduct on-site audits and inspections of our operating facilities and quality plans ? we encourage them to do so. Why? Because year in, year out, Ervin AMASTEEL wins more quality recognition awards and passes more customer quality assurance audits than any other abrasive manufacturer in the world.

We have made an uncompromising commitment to never-ending improvement. In product. In technology. In systems. In personnel training. In customer support.

It is a process that ensures that our abrasives will always represent the highest quality standards in the world. Our dedication to this philosophy supports the success of our customers with lower materials use and higher productivity.

It is what you would expect of a business that has a long track record of setting industry standards.
