## **Custom Blast Rooms**

Here is an example of one of our blast room installations.

**We installed this one for a stainless steel food processing fabricator.  
Total time involved in erection was about one week once the foundation was set.**

This company builds food processing equipment out of stainless steel. The finished product has to be bead blasted with glass bead to remove contamination from welding and fabrication.

12' Wide x 10' Tall x 20' Long  
2ECB's and recovery system
