Custom Blast Rooms

Here is an example of one of our Plastic Media blast room installations.
Customer provided the room – we provided the equipment.

We installed this one for a Custom Car facility.

Total time involved in erection was about three days once the room was built.

This is a plastic media stripping facility. It uses a reclaim over a 60 degree pressure pot. The reclaim and pot combined hold 12 cft of media. This allows for about 3hrs. of uninterrupted blasting.
